

WE WILL PROVIDE
THE BEST SERVICE
FOR YOU

We “SELCO” are a Partnership firm,
engaged in manufacturing the best quality
range of Passenger Lifts, Commercial Lifts, Hospital Lifts,
Capsule Lifts, Goods Lifts, Hydraulic Lifts, Escalators and many more.

Home Elevator

Home elevators not only increase the value of your home, but can also provide you stunning showpiece. At the same time, home lifts can allow the disabled and elderly to easily move about a multi-level dwelling.

The term "home elevator" commonly refers to a lift enclosed in a shaft, and which can travel vertically as much as 15 m. (50ft.). Home elevators make it easier to carry groceries, laundry or anythings else from one floor to another. And today, they're fully customizable-choose from a wide range of materials, such as marble walls or stained glass, to turn your home elevator into an expression of your own unique style !

Comfortable

Traction Elevator System

We you need to move a lot of people in a little time - economically. comfortably and reliably you need a traction elevator.

Ideal for high and medium-rise buildings. Traction elevator delivers smooth, quick acceleration, energy efficiency and attractive cost for high-rise building. Especially, these lifts impress with their versatility. Power and speed.

A Superior combination of flexibility and performance. To create the highest quality traction elevators, our designers and engineers put their technological creativity to its full potential. Our traction elevators combine the latest digital technology with world-renowned construction to achieve a new level of precision, energy efficiency, safety and reliability.

- The traction elevator system is the most popular due to its flexibility.
- Choose between two types of traction lifts : geared and gearless.
- The geared traction lifts is composed of 2 parts : the gear box and the electric motor.
- The machinery may be located at the top of the building, or in the basement.
- If you need a high-speed elevator in high-rise building, a traction elevators is your only choice.
- Capitalizing on advances in motion control technology (Variable Voltage Variable Frequency.), a frequency inverter smoothen the starts and stop of the cabin and conserves energy.

Using high quality gear drive machines and 3vf drives, these lifts performance is of the highest standard.

It purifies the power grid environment

It improves the machine room temperature

Above 30% of energy-saving

Traction Geared Machine

MRL Elevator

Advantage of MRL elevators :

- Permanent Magnet Gearless Machine for smooth and quiet motion.
- 1 m/s to 1.6 m/s speed range (180 starts per hour.)
- 10 to 16 passenger load range (680-1088 kg).
- Smooth ride, due to the first-class roller shoe suspension.
- Versatile landing and car door configurations.
- Earthquake-friendly jugged guiding.
- Small control cabinet on the upper level.
- Totally integrated system for greater reliability.
- Time and money-saving benefits : long lifespan, low operating cost, easy installation and service.
- Cost-efficient elevator application, No Machine room

Installation

Dumbwaiter/ Goods Lifts

- ▶ Dumbwaiter are small freight elevators (or lifts) intended to carry objects rather than people.
- ▶ Dumbwaiters found within modern structures, including both commercial, public and private buildings are often connected between multiple floors. When installed in restaurants, schools, kindergartens, hospitals, retirement homes or in private homes, lifts generally terminate in a kitchen.
- ▶ The term seems to have been populaized in the United States in the 1840s, after the model of earlier "dumbwaiters" now know as serving trays and lazy Susans.

Capsule Elevator

Glass capsule elevators give an upscale, attractive feel to office, shopping malls, multiplexes and other prestigious buildings. These lifts owe their stunning looks to the large glass viewing panels which provide entertaining ride to passengers. Capsule elevators work just as well as small personal lifts for private homes as they do in large office and commercial buildings. Installation on the exterior face of the building or in the lobby will totally change the look of a building. And of course, they incorporate state-of-the-art technology.

Application :

Hotels

Shopping Malls

Offices

Multiplexes

Escalator

Elevators with belt technology ensures smooth and Comfortable ride. Minimum noise generation is also an advantage of these elevators. They can be used for home elevators as well as commercial elevators.

FEATURES

- ▶ Deploys polyurethane coated steel belts for suspension.
- ▶ Manual release for brake provided.
- ▶ Insulation class F with thermistors for thermal protection.

Car Stacker Parking

Two Car Parking System :

Salient Features:

This system features a pallet that is lifted up after the car is loaded. Thus additional parking can be made available in the space below the loaded pallet. Both indoor and outdoor installations are possible. Installation can be done on simply flat area with no additional architectural work. These systems are hydraulically operated. Preferably these systems are valet parking systems.

Automatic Door Series

The automatic doors at grocery stores and office buildings mainly exist for convenience. The automatic doors in an elevator, on the other hand, are absolutely essential they keep people from falling down an open shaft. Elevators use two different sets of doors. doors on the cars and doors opening into the elevator shaft. The doors on the cars are operated by an electric motor, which in turn is operated by the elevator computer.

Integrated Control Panal

Energy - efficient and simple to use : our panels put you in control over your elevators systems.

Selco has been installing and servicing elevators for more than a decade. Selco bring Millennium most advanced energy saving VVVF elevator system with highly sophisticated Microprocessor based Pulse width Modulation (PWM) technology Selco complete integrated VVVF control system ensures best return of cost.

CONTROL PANEL FEATURES

No. of Stop :

& Stop Down Collectiv & 6 Stop
Collective Selective
Ext. 16 Stop Down Collectiv and
11 Stop Collective 1.0 meter/sec.

Speed : Up to 5 msec.

Operations :

Regular V3F, Down Collective V3F and
Collective Selective V3F,
Also suitable for Auto Door, Double Door
(Two Side Opening)

HYDRAULIC

HYDRAULIC PANEL FEATURES :

All Type of Hydraulic Program Supported.
You Can program as per your no. of Value requirement.
All Value and motor on off timing is programmable on board.
You can also program for double side Auto Door.
Up to 8 Stop Regular as well as AUTO DOOR supported.
All other Feature same as Card.

ARD

AUTOMATIC RESCUE DEVICE FEATURES :

In case of a main power supply failure, the lift stopped
between two floors is moved to floors level, the automatic
door id opened and passengers are out safely, For lifts with
automatic door, in case of a main power supply failure at
floor level, the door is remain opened

USE :

This device is suitable for those buildings without as
emergency power source allocated for the elevator.
